## RUN-ON/RUN-OFF CONTROL PLAN CERTIFICATION

### BIG FORK RANCH FACILITY PERMIT NO. 3552014

This will serve to certify that the Big Fork Ranch facility Run-On/Run-Off Control Plan is designed, constructed, operated, and maintained in accordance with DEQ rules at OAC 252:517-13-2 to: 1) prevent run-on from entering active CCR cells, and 2) contain run-off from active CCR cells after a 24-hour, 25-year storm at the Big Fork Ranch facility.

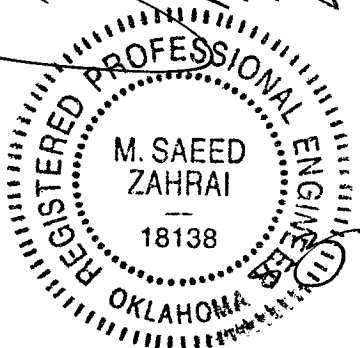

An inspection of the site was conducted on July 12, 2026, to evaluate the Run-On / Run-Off Control plan. Other than minor reclamation activities within Cell No. 8, there are no changes that would substantially affect the approved plan.

The revised Drawing No. 4, dated June 6, 2023, showing the entire plan view for the facility was submitted to the Oklahoma Department of Environmental Quality on June 8, 2023.

This Certification is prepared under the requirements of DEQ rules at OAC 252-517-13-2(c)(5).
